

15.2 POLICY - Environmental Protection

In accordance with the Occupational Health and Safety Policy of the principal contractor's management is also committed to protecting the environment. This includes the implementation and management of a waste minimisation program to ensure that generated product is recycled or re-used.

To achieve our objectives in regards to protection of the environment the principal contractor, will do the following: –

- (1) Ensure that training is provided to all employee's and independent contractors so that they are aware of their obligations to protect the environment and its surrounding flora, fauna and waterways.
- (2) Implement systems of work for employees and contractors so as to provide a medium to minimise waste generation.
- (3) Provide a workplace that is environmentally safe and without risk to the health of its employees, independent contractors or the neighbourhood.
- (4) Ensure that the operations of the principal contractor and subsidiary companies do not affect the general public residents or tenants in the surrounding areas.

Management of the principal contractor is committed to the health, safety and well-being of its employees and independent contractors, and this includes protecting the environment that we work in. With the above systems in mind protection of the environment can be achieved.
